PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack and backend development, having built projects ranging from microservices-based systems to real-time socket applications and AI-driven data pipelines. Strengthened by a software engineering internship covering backend development, DevOps, and CI/CD workflows. Strong fundamentals in OOP, data structures, and networking, with a growing focus on backend engineering and distributed systems, and a drive to apply technical depth to research-oriented problems.

EDUCATION

Bachelors In Computer Science(6 Semesters Completed)

Pir Mehr Ali Shah Arid Agriculture University , Rawalpindi 09/2023 – 05/2027(Expected)

CGPA :- 3.84 / 4.00

Intermediate In Pre-Engineering

Kips College , Rawalpindi 2020 – 2022

Score: 946 / 1100

Matriculation

Anglo Arabic Public Secondary School , Rawalpindi 2008 – 2020

Score: 927 / 1100

TECHNICAL SKILLS

- **Programming Languages:** C++, Java, Python, JavaScript
- **Web Technologies & Frameworks:** HTML5, CSS3, React, Tailwind CSS, PHP, Spring Boot
- **Databases:** MySQL, SQL
- **Core Concepts:** Data Structures, Algorithms, Object-Oriented Programming (OOP), File Handling
- **Networking:** Computer Networks, IP Addressing, VLANs, Socket Programming
- **Tools & Platforms:** Git, GitHub, VS Code, Dev-C++, Cisco Packet Tracer, Intellij Idea, Android Studio, Version Control
- **Soft Skills:** Problem Solving, Team Collaboration, Continuous Learning

PROJECTS

- **Smart Library Book Management System** | (Java, Spring Boot, React.js, MySQL, Kafka, Docker) Built a microservices-based library system with JWT auth, role-based access control, Kafka-driven notifications, and Docker deployment — powered by a React.js + Tailwind CSS frontend.
- **B2B SME Data & AI Search System** | (Python, Selenium/BeautifulSoup, n8n, REST APIs): Built an automated data pipeline scraping Pakistan SME business data (contact, industry, location) using Python, with WhatsApp availability detection and an n8n-orchestrated AI-powered search engine supporting industry/city/keyword filtering with ranked results.
- **E-Commerce Marketplace Backend** | (Java, Spring Boot, Docker): Designed and developed a RESTful backend for an e-commerce marketplace, handling product catalog, cart, and order management, containerized with Docker for consistent deployment.
- **Multi-Client Chat Application** | (Python, Socket Programming, Multithreading): Designed a client-server chat system using TCP sockets and multithreading to handle concurrent client connections, broadcasting messages in real time across all connected users.
- **Software House Network Design | (Cisco Packet Tracer, VLANs, IP Addressing):** Designed and simulated a scalable network infrastructure for a software house supporting 60 users using Cisco Packet Tracer. Configured IP addressing, routers, switches, VLANs, and device connectivity to ensure secure, reliable, and efficient network communication.

ADDITIONAL PROJECTS

- Personal Portfolio Website | (HTML, CSS)
- Weather Application | (HTML, CSS, JavaScript, OpenWeather API)
- Snake Game | (Python, Turtle Graphics)
- Secure Voting System | (C++, File Handling)
- Bank Management System | (C++, File Handling, OOP)
- Airline Management System | (C++, File Handling)
- Student Notes App | (Java, XML, Android Studio)

COURSES

Search Engine Optimization (SEO)
DigiSkills.pk | Rawalpindi , Pakistan 08/2025 – 11/2025

Artificial Intelligence Using Python
DigiSkills.pk | Rawalpindi , Pakistan 04/2026 – 07/2026

Hyper Text Markup Language (HTML)
Knowledge Gate 02/06/2026

Cascading Style Sheet (CSS)

Knowledge Gate 04/06/2026

JavaScript

Knowledge Gate 16/06/2026

Work Experience

Software Engineer Intern | Planet Beyond Pvt. Ltd July 27 – September 7, 2026

- Worked with Java, Spring Boot, and Apache Kafka to build backend services, gaining hands-on exposure to microservices architecture, event-driven communication, and containerized deployment using Docker; contributed to and learned CI/CD workflow practices.
- Developed frontend interfaces using React.js, Tailwind CSS, and React Native, and gained practical understanding of the full project deployment process from development to release.
- Worked on DevOps practices including building CI/CD pipelines in Jenkins, deploying and managing services across Ubuntu and Rocky Linux servers, and learning Kubernetes fundamentals for container orchestration.

WORKSHOPS AND TRAININGS

Smart Testing with Selenium Workshop

Participated in a hands-on workshop on automated software testing using Selenium, conducted at **Pir Mehr Ali Shah Arid Agriculture University Rawalpindi**. Gained practical knowledge of web application testing, test automation concepts, and Selenium testing tools.

LANGUAGES

Urdu

Native proficiency in reading, writing, and speaking.

English

Professional working proficiency for academic and workplace communication.
